ENVIRONMENTAL & SUSTAINABILITY POLICY

Steel Mains recognizes that its operations impact upon resource use, air, water and land.

It is Steel Mains policy to achieve and maintain a high standard of Sustainable practices to minimize the effect on the Environment through its processes relating to the manufacturing and supply of steel, coated and lined water and wastewater pipeline products.

Steel Mains is firmly committed to the quality of life of its employees, customers, and community. Through innovation, process improvement, and sound manufacturing practices Steel Mains will also encourage and promote sustainability in every area of our business operations.

Specifically, it is Steel Mains policy to:

➢ Comply with all environmental laws and regulations and other requirements to which Steel Mains is subject to and uphold the spirit of the law; as applicable to the manufacturing and supply of steel, coated and lined water and wastewater pipeline products.

➢ Provide the support and resources necessary to ensure compliance with the requirements of the Company, environmental laws and regulations and other requirements;

➢ Ensure that its employees, contractors, visitors and suppliers are informed about this policy and are aware of their environmental laws and regulations and other requirements;

➢ Seek continuous improvement by monitoring environmental performance against periodically reviewed objectives and targets by considering evolving knowledge and community expectations:

➢ Ensure that it has management systems to identify, control and monitor environmental impacts arising from its operations. These systems will be used to facilitate continuous improvement in environmental performance;

➢ Report and record environmental incidents and initiate remedial action to improve performance, rectify damage and prevent recurrent incidents;

➢ Conduct research and establish programs to conserve resources, minimize wastes, improve processes and protect the environment, and prevent pollution;

➢ Continuously strive to identify, develop and implement strategies to achieve ZERO landfill waste disposal targets to minimize the Environmental impact associated with the manufacturing and supply of steel, coated and lined water and wastewater pipeline products;

➢ Seek collaboration in our sustainability efforts through negotiation of sustainable products and processes from our vendors and suppliers;

➢ Evaluate every component of our manufacturing and business practices for continual improvement in sustainable principles and practices.
